

Astute LXP Release Notes – Late July 2025 (V3.4.1)

Release Date: July 31st 2025

This update brings a range of improvements designed to make life easier for both learners and administrators. We've added clearer navigation options in the Risk Assessment Builder, made it simpler to personalise certificates, and improved the User Interface in many places as well.

We've also tidied up a number of issues that were affecting the learner experience and made a few small changes to help pages load more smoothly on mobile.

If you have any questions about the update or want to find out more, your Account Manager or our Support team will be happy to help at astutesupport@vinciworks.com.

Enhancements

- The Recommended Image size has been added to each place you can upload an image across Astute.
- A back button added to Risk Assessment Builder to help navigation.
- When the *Create From Template* option is selected when building a Risk Assessment, the title will now copy into the current title for you to edit.
- Standard Duration and Learner Username are now accepted as merge fields and can be added to a certificate template.
- Option added to the Risk Assessment Builder, allowing the ability for a learner to skip to the next section if a certain answer is provided.
- Any tables showing learners across the whole site have had their appearance enhanced.
- It is now simpler to see which job titles belong to which department when filtering learners on enrolment pages.

Performance Improvements

- The Banner Image has been removed from the mobile version to help with navigation.

Bug Fixes

- Removed the Save button from Reporting Visual Dashboard as they were showing despite you being unable to save Visual Dashboard reports.
- Fixed issue where Self-Enrolment Catalogue would not load.
- Removed the option #EnrolmentStatus# from Trigger Email merge field options as showing in error.
- Fixed bug that caused some video's to not upload into the Videos section.
- Fixed issue stopping the processing of previous LMS Records into enrolment events.
- Removed *Include Future Events* from Compliance Reporting as it did nothing.
- Stopped &'s on the Learner's page filters showing as &
- Fixed visual issue where headers on the learners table within Enrolment Events would not show.

Feedback

For any issues, get in touch with our support team at astutesupport@vinciworks.com.
