

Astute LXP Release Notes June 2026 (V3.5.4)

Release Date: June 11th 2026

This update continues our focus on Instructor-Led Training, reporting clarity, and smaller refinements that make day-to-day administration in Astute that little bit quicker.

The headline addition this month is ILT Chaser Emails, alongside more flexibility in ILT communications and a clearer view of pending changes on enrolment events. We have also tidied up a number of areas across Risk Assessments, certificates, and ILT class management.

Enhancements

- A new Pending Changes indicator on the enrolment events page makes it clear at a glance where changes are waiting to be applied.

Bug Fixes

Reporting and Risk Assessments

- Risk Assessments created from a template now correctly include their questions again.
- Resolved an issue that could prevent a Risk Assessment from being created from a template.
- Learner exports now handle apostrophes in an email address or username correctly.
- Courses with certificates disabled no longer display a certificate in My Progress.

Instructor-Led Training

- Calendar invites now arrive as a proper invite with the joining link showing, rather than as an attachment.
- First Passed and Last Passed dates now display correctly on ILT certificates.
- Duplicate certificates no longer appear on the Certificates page.
- ILT emails now render correctly, without any formatting showing in the text.
- Adding attendees to a class in the past no longer raises a false clash warning.
- A class address now saves and displays as expected.
- Long module names no longer affect the page layout.
- Improvements to Course Search in ILT.
- Images can now be removed from a module.
- Further Chaser and Trigger email and merge field options added.
- Helpful tooltips have been added to the Minimum and Maximum Attendees fields when setting up a class.

Retirements

- The Language Specific Titles option has been removed from the event details page.
- Learning Analytics, our legacy reporting system, has been removed from Astute. It has been gradually phased out since LXP Reporting was introduced in 2019 and is no longer supported. If you were using Learning Analytics, please contact our Support team who will be happy to help you move to one of our other reporting tools.
