

Astute LXP Release Notes May 2026 (V3.5.3)

Release Date: May 28th 2026

This update focuses on continued polish across reporting, Instructor-Led Training, and day-to-day administration in Astute.

A number of changes in this release improve the clarity and reliability of LXP Reporting and Risk Assessments, with extra context on the Risk Task views and broader coverage of re-enrolments in the future enrolments report. Alongside this, we have made further refinements to Instructor-Led Training, including additional Mail Merge options for ILT trigger emails and a series of smaller usability improvements for administrators managing classes and attendance.

Enhancements

Reporting

We have continued to improve LXP Reporting and the Risk Task views to give administrators clearer context and more complete data.

- The LXP Report for "show all enrolments due to enrol in the future" now includes re-enrolments from both Astute and Previous LMS Records, giving a fuller picture of upcoming activity.
- Risk Task List now shows the assessment title on the table, making it easier to identify the source of each task at a glance.
- Risk Task By Concern now shows the answer that triggered the concern, helping administrators understand the context behind each item.

Re-enrolment

- The Re-enrolment Activities page now requires a replacement course to be selected when Replace is chosen, preventing incomplete re-enrolment setups.

Learner and Email Management

- A new option on the Learners Page lets administrators jump straight to a learner's My Progress page, making it quicker to check enrolment statuses.
- The Emails search in My Progress now requires a date range, returning results faster and keeping searches focused.

Instructor-Led Training

We have continued to expand and refine ILT, with new options for communications and tighter controls for scheduling and trainer selection.

- Additional Mail Merge fields and trigger email options are now available for ILT, giving administrators more flexibility when building ILT communications.
- Classes can no longer be scheduled for archived Courses from the Training Schedule, keeping the schedule consistent with course status.
- Trainer search now lists active learners only, making it easier to select the right person.

Bug Fixes

Reporting

- Refined how First Passed and Last Passed dates are displayed to ensure consistent ordering in a rare edge case.
- LXP Reports built by Department Heads now build reliably.
- Risk Assessment Reports in LXP Reporting now include data from assessments where a question has since been deleted.
- Improvements to how specific certificates are assigned to courses.

Instructor-Led Training

- Manage Attendance now correctly shows all attendees for a Class.
- Uploaded certificates now display correctly in My Progress and on the Learner Certificates page.
- Selected learners are now retained when closing and reopening the Add Attendees window.
