

## Astute LXP Release Notes – July 2025 (V3.4.0)

Release Date: July 17<sup>th</sup> 2025

Previous LMS Records has landed, letting you bring every historic completion from other LMS' to Astute and will maintain re-enrolment/retrain cycles, keeping your training cycles on track seamlessly. Imported records will show in LXP Reporting and on each learner's My Progress page. Please contact your Account Manager or our Astute Support Team at [astutesupport@vinciworks.com](mailto:astutesupport@vinciworks.com) for more information.

You will also notice quicker page loads, cleaner reports, an expanded video player, and small visual updates in Risk Assessments and email notifications. These refinements keep the platform running smoothly and make every day work easier for admins and learners alike.

### New Features

#### **Previous LMS Records**

You can now import historical training records from other LMS platforms directly into Astute. This ensures all your training data, both past and present, can be viewed and reported on in one place. Imported records will appear in LXP Reporting and on the learner's My Progress page.

During the import process, records can be mapped to existing enrolment events within Astute. If an expiry date is included and re-enrolment has been set up on the event, learners will be automatically re-enrolled when the time comes. Administrators will also be able to view these records on a dedicated page and assign records to events, where appropriate.<sup>1</sup>

Our Support team can manage this process for you, including uploading the records and performing the initial mappings. If you are migrating from another LMS, or are an existing client looking to consolidate records, please contact our Support team at [astutesupport@vinciworks.com](mailto:astutesupport@vinciworks.com) to get started.

### Enhancements

- Risk Assessments can now have header images. These can be uploaded in the Risk Assessment Builder.
- Astute now supports HLS links as a video type.
- Survey Response Reporting has been made clearer.

---

<sup>1</sup> Events can only be assigned or changed if the re-enrolment has not already occurred.

- Added further help instructions to *Set a password to open attachment* option when scheduling an LXP Report Pack for email.
- A loading wheel has been added to the Risk Task List.

### Bug Fixes

- Fixed load times on Programmes for learners if the Programme contains dependencies.
- #TargetCompletionDate# on the enrol onto event trigger has been fixed.
- Fixed bug stopping managers from seeing their teams Risk Tasks.
- The Privacy Policy footer no longer blocks the controls for the video player.
- Corrected spelling mistake in advanced options of the branding settings.
- Fixed issue where scheduled report end dates were not accepted.
- Attach Certificate option only show on triggers for course passes or completions.
- Resolved potential issue where the course title would be incorrect in enrolment trigger emails.
- Stopped the possibility of an event group enrolling a learner twice on the same activity,

### Feedback

For any issues, get in touch with our support team at [astutesupport@vinciworks.com](mailto:astutesupport@vinciworks.com).
