

Astute Release Notes September 2026 (V3.5.10)

Release Date: September 3rd 2026

This release is mostly reporting. Report packs and Compliance Reporting are easier to work with, the learner home page makes better use of wider screens, and there are fixes across risk assessments, the Learners page and chaser emails. There is also a planned maintenance window on Friday 11 September.

Planned maintenance, Friday 11 September

Astute will be unavailable from 7pm UK time on Friday, September 11th until 6am Friday, September 12th as we perform a server upgrade . We have placed a notice on the site in the run up as a reminder. Nothing is needed from you, and there is no change to how anything works afterwards.

Enhancements

- **LXP Reporting:** report packs can now be renamed. Open the three dot menu on a pack and choose Rename, the same way you already rename a report.
- **LXP Reporting:** you can now choose how many report packs to show on a page. A rows per page selector sits below the packs list, with 10, 25 and 50. It stays on 10 unless you change it.
- **Compliance Reporting:** you can now choose how many rows to show on a page, using the selector below the table, so there is less clicking through pages. The options are capped to keep the report loading quickly.
- **Learner Home:** the page now uses the full width of wider screens rather than leaving space down each side. Learners with a lot of training see more of their activities at once.
- **Enrolment Events:** the target completion selector, where you set a number of days, weeks, months or years, has been tidied up so it is easier to read what you have set.

Bug Fixes

- **Learners:** a learner added without a job title can now be opened and edited. Job title is now required when you add a learner, so it cannot happen again.
- **Risk Assessments:** the copy button on the risk assessment list now creates a copy again.
- **Risk Assessments:** completed risk assessments no longer appear on the learner certificates page, and they now show in the Risk Assessments section of My Progress as expected again.
- **LXP Reporting:** Move to pack and Copy to pack now stay still while you scroll the list of packs, so you can select the one you want however many packs you have.

- **Chaser Emails:** the menu down the left of the chaser set up no longer gets squeezed when a lot of activities are selected.
