

## **Astute LXP Release Notes January 2026 (V3.4.6)**

Release Date: January 26<sup>th</sup> 2026

This month's update focuses on improving enrolment handling and clarity for administrators, alongside a number of fixes to reporting and re-enrolment workflows. We've made it clearer when learners are scheduled for future enrolment due to re-enrolment rules or previous LMS records, giving administrators better visibility and control. This release also includes a series of fixes to the LXP Report Builder, enrolment rules, and compliance reporting to improve reliability and accuracy across the platform.

### **Enhancements**

- Courses page – Loading wheel added when Copy Course is clicked.
- Re-enrolment activities – instructions for each part have been made clearer.
- Enrolments - If trying to enrol a learner onto an event where they are not due to be enrolled yet because of a previous LMS record for that event has not expired, or a re-enrolment date onto the event has not been reached yet, administrators will be notified of this and asked if they want to keep the current scheduled enrolment date or override this and enrol the learners early.
- Enrolment Rules - Option added to Enrolment Rules to have the event enrol any learners who match the rules to be enrolled before the expiry of any Previous LMS Records they have mapped to the event.

### **Bug Fixes**

- LXP Report Builder – Fixed issue where editing a filter would remove all the previously selected options.
- LXP Report Builder - Fixed Reports not building if the title contained an apostrophe.
- LXP Report Builder - Additional Fields that are not checked as "Include in Reports" no longer show as options in the Report Builder as expected
- Enrolment Rules - Enrolment Rules not enrolling learners if the rules are set up as OR instead of AND has been fixed.
- Re-enrolments - Fixed issue that Target Completion Dates were not copying correctly to re-enrolled events.

- Re-enrolments - Re-Enrolment Event Titles now show the correct requested date format. Format can be changed in the re-enrol settings in the Event Details page
- Previous LMS Records – Expired records onto events that have not started yet now wait for the start date instead of enrolling the user early.
- Previous LMS Records - Stopped Learners with Previous LMS Records matching to an enrolment event that has not started yet from being enrolled before the start date
- Compliance Reporting – Courses titles for bespoke courses now show correctly.
