

Astute LXP Release Notes April 2026 (V3.5.1)

Release Date: April 30th 2026

Instructor-Led Training (ILT)

Instructor-Led Training (ILT) is now available in Astute for all Premier clients.

ILT allows you to manage classroom, virtual and hybrid training alongside your existing eLearning, bringing all training into one place. It replaces the previous Face-to-Face feature with a redesigned and more flexible approach to managing in-person and live training.

Administrators can create courses, schedule classes, manage attendance and track outcomes, while learners can enrol onto sessions directly or request access where approval is required. All activity is integrated with Astute's existing enrolment events and reporting, so training is managed and tracked in a single system.

ILT has been developed based on client feedback and tested with early adopters, focusing on flexibility and making day-to-day administration simpler.

What's included:

- Create training courses and schedule one or more classes with defined dates, locations, trainers and capacity
- Manage classroom, virtual and hybrid sessions in one place
- Enrol learners directly or allow them to request access with approval workflows
- Apply capacity controls and manage waitlists
- Automatically send calendar invites to confirmed attendees
- Capture attendance and outcomes for each session
- Report on ILT activity through Astute's reporting tools

ILT is available to all Astute Premier clients and can be enabled on request.

If you would like to enable ILT or learn more about how it can be used within your organisation, please contact your Account Manager or the Astute Support team.

Bug Fixes

- Learners with future enrolment dates from Previous LMS Records no longer appear in the Pending section of enrolment events.
- Fixed an issue where some reports failed to build when using additional fields
- Course tile and banner images now display correctly after upload
- Removing a certificate template from grouped events now works as expected
