

Astute LXP Release Notes August 2026 (V3.5.8)

Release Date: August 6th 2026

This release concentrates on the everyday admin work: setting up enrolment rules, keeping on top of overdue training, and managing Instructor-Led Training classes.

Instructor-Led Training sees another solid round of improvements, alongside the usual set of fixes across reporting, certificates and emails.

Enhancements

- **Enrolment Rules:** The Enrolment Event Rules page now matches the Enrolment Event Wizard version. The table is clearer, the matched learner count is shown, and you can view the learners a rule will affect before confirming. The confirmation step shows how many enrolments and unenrolments will occur before processing.
- **Chaser Emails:** Event Group chasers have a new "overdue by" option, so they can keep chasing for learners after the target date rather than stopping as soon as a learner goes overdue.
- **Risk Assessments:** The Risk Task List full report view can now be exported to Excel.
- **Instructor-Led Training:** Class details can now be edited right up until the attendance register is completed, rather than locking as soon as the class is scheduled.
- **Instructor-Led Training:** New classes now default to In Person instead of Hybrid.
- **Instructor-Led Training:** The validity period options are clearer when creating a course.

Bug Fixes

- **Instructor-Led Training:** Approval emails now show the course name and approver name correctly.
- **Instructor-Led Training:** Chaser email frequency and time settings now save correctly.
- **Instructor-Led Training:** The chaser frequency and time step no longer shows all four options at the same time.
- **Instructor-Led Training:** Courses created without a validity period no longer save as a period of 0 days, and no longer report an expiry date matching the completion date.
- **Certificates:** Certificates generated from self-enrolment courses now attach to course complete trigger emails.
- **LXP Reporting:** The Report Builder no longer fails to build when a department name contains an apostrophe.
- **LXP Reporting:** Scheduled reports now show the correct Next Scheduled date, rather than today's date.
- **Programmes:** Programmes can be copied again.
- **Trigger Emails:** The All courses toggle no longer overlaps the heading above it.
- **Security:** Further changes from penetration testing results. The report will be published in due course and available upon request.
